Bennoc Call with OEPA

Calculate assimilative capacity downstream of Piney
downstream load - upstream load
take 30% of load
compare to Piney Creek load

Ohio is saying this is an intermittent discharge and there are no set-asides for wet weather situations

Ohio says that one pond only discharged 17 times, the other pond is more regular but the facility wants to expand the pond which will reduce the number of discharges

Ohio says that the OEPA Director, Assistant Director, and Governor's office will be on the Thursday call.
